TRAININGS

The Web Developer Bootcamp 2021

Successfully Completed my 8 week, The Web Developer Boot-Camp 2021 Training at **Udemy**.

Training is about **Full Stack Web Development**, The Training consists of

Technologies **HTML, JS, MongoDB, express, nodes.js, Error validations, Bootstrap** and many more.

ACTIVITIES

- I had organized an online **coding event** for CT students.
- I also had organized a **techno fest** at CT institutions.
- Participated in **tech event** with my team.

OBJECTIVE

I seek challenging opportunities where I can fully use my skills for the success of the organization. I love working on new and innovative ideas and want to contribute something in bringing the world to the digital platform. I love to engineer new things.

PROJECTS

Yelp - Camp - JS, MongoDB, node.js,

[Project-Link](#)

Express.js etc.

- Yelp -Camp aims at serving the department of camping.
- Designed and implemented **Authorization (Passport), MongoDB infrastructure** to store reviews/comments data relevant information of users etc.
- Yelp camp that allows you to **add campgrounds** for other users to **comment** on and **rate**, as view campgrounds added by other users.

Jeet - Travels - HTML, CSS, JS etc.

[Project-Link](#)

- **Jeet - Travels** is the website for **tourists** for the desired places, services etc.
- The project aims at making the best tourism.
